PROFESSIONAL SUMMARY

Results-driven B.Tech IT student specializing in full-stack development with practical experience in AI, computer vision, and web application development. Eager to leverage skills in building and deploying impactful applications, collaborating effectively, and contributing to software engineering teams. Proficient in modern JavaScript frameworks, REST APIs, databases, and problem-solving.

PROFESSIONAL EXPERIENCE

Data Science & Analytics Intern

Future Interns | Jun 2025 – Jul 2025

- Developed Power BI and Looker Studio dashboards to visualize ad campaign performance and identify key customer trends.
- Analyzed customer feedback data using Python to extract actionable insights, directly supporting marketing decisions.

PROJECTS

NutriScan – AI-Based Nutrition Scanner App

- Built a Flutter application integrating barcode scanning and ingredient photo analysis to provide health ratings for over 100 food products.
- Implemented a self-learning database feature enabling instant barcode lookup after the initial ingredient scan for enhanced user experience.

Real-Time Attention Monitoring System for Classroom

- Developed a real-time classroom monitoring system leveraging YOLOv8 and DeepSORT to accurately track student presence and attention direction.
- Generated automated attention reports and a live dashboard, scalable to monitor 30+ students with appropriate camera hardware.

Online Examination & Coaching Platform

- Deployed a timed MCQ examination platform with auto-submit functionality, utilized in actual college exams, built with JavaScript and REST APIs.
- Engineered an administrative dashboard for efficient exam scheduling, automated result generation, and comprehensive question management.

EDUCATION

B.Tech in Information Technology

2022 – 2026

LBS College of Engineering, APJ Abdul Kalam Technological University (KTU), Kasaragod, Kerala

CGPA: 7.42

SKILLS

Programming Languages: C, Java, Python, JavaScript, HTML, CSS

Frameworks & Libraries: Node.js, React.js, Flutter

Databases: MySQL, MongoDB, SQL

AI/ML & CV: YOLOv8, DeepSORT, OpenCV

Tools: Git, GitHub, Postman, Visual Studio Code

Professional Skills: Communication, Problem-Solving, Team Collaboration, Adaptability, Analytical Skills

CERTIFICATIONS

Published Research Paper – ICSTS 2025 (Real-Time Student Engagement Assessment Framework)

Dec 2025

ACHIEVEMENTS

- YIP District Level Selection – NutriScan AI Nutrition Scanner App (July 2025)
