

UPDATED RESUME

Professional Summary

Ambitious B.Tech IT student with a strong foundation in full-stack web development, proficient in building applications using React.js, Node.js, JavaScript, and REST APIs. Eager to leverage skills in Python, Java, and database management (MySQL, MongoDB), coupled with robust problem-solving and collaboration abilities, to contribute to impactful software engineering projects. Demonstrates a keen interest in applying AI/ML concepts to real-world systems.

Skills

- JavaScript
- Python
- Java
- HTML
- CSS
- React.js
- Node.js
- Flutter
- REST APIs
- MySQL
- MongoDB
- SQL
- Git
- GitHub
- Postman
- YOLOv8
- DeepSORT
- OpenCV
- Visual Studio Code
- Software Development Life Cycle (SDLC)
- Problem-Solving
- Team Collaboration
- Communication
- Adaptability

Projects

NutriScan – AI-Based Nutrition Scanner App

- Engineered a Flutter mobile application, NutriScan, integrating barcode scanning and ingredient photo analysis to deliver instant health ratings for over 100 food products.
- Implemented a self-learning database system, enabling efficient real-time barcode lookup and ingredient information retrieval after initial scans.
- Applied AI/ML and computer vision techniques to process nutritional data, enhancing user experience and data accuracy.
- Demonstrated full-stack development capabilities by building both the user-facing application and the underlying data management system.

Real-Time Attention Monitoring System for Classroom

- Designed and implemented a real-time classroom monitoring system utilizing YOLOv8 and DeepSORT for accurate student presence and attention direction tracking.
- Developed an automated reporting module and live dashboard to visualize attention metrics, demonstrating scalability for 30+ students with appropriate hardware.
- Showcased expertise in computer vision, real-time data processing, and system architecture for deriving actionable insights.
- Managed the development lifecycle from conceptualization to implementation, highlighting robust problem-solving and technical integration skills.

Online Examination & Coaching Platform

- Developed and deployed a robust timed MCQ online examination platform using JavaScript and REST APIs, successfully utilized for actual college exams.
- Engineered a comprehensive admin dashboard for seamless exam scheduling, automated result generation, and efficient question management.
- Implemented backend logic for auto-submission and real-time exam monitoring, ensuring integrity and scalability.
- Managed database interactions for question banks, user data, and result storage, demonstrating proficiency in full-stack web development.

Resume Tips

- Correct 'Graduated B.Tech IT student' in the summary to accurately reflect your current enrollment status (e.g., 'Current B.Tech IT student' or 'B.Tech IT student pursuing...').
- Quantify achievements and impacts in the 'Data Science & Analytics Intern' role (e.g., 'identified X% of customer trends,' 'optimized Y marketing decisions by Z%').
- Ensure the 'Data Science & Analytics Intern' dates (Jun 2025 – Jul 2025) are clearly marked as 'Planned Internship' or similar if the experience has not yet commenced.
- Consider explicitly categorizing skills into 'Technical Skills' (Programming Languages, Frameworks, Databases, AI/ML & CV, Tools & Concepts) and 'Professional Skills' to enhance readability and ATS parsing.
