PROFESSIONAL SUMMARY

B.Tech Information Technology student with a strong diploma foundation and hands-on experience in web development and automation. Seeking a Software Developer Intern role to apply proficiency in Java, Python, JavaScript, and SQL databases. Eager to contribute to web application development, implement REST APIs, and leverage problem-solving skills in a collaborative team environment.

PROJECTS

Farming Assistant Web Service

- Developed a digital web platform connecting farmers with suppliers, streamlining agricultural commerce and reducing intermediaries.
- Implemented real-time price tracking, direct communication, and secure transactions to enhance efficiency and transparency.

Automation of AISHE Report Generation

- Engineered an automation solution for AISHE report generation, significantly reducing staff workload and documentation costs.
- Built robust data-processing logic that enhanced report accuracy and decreased manual intervention by approximately 80%.

Student Semester Registration Application

- Created a comprehensive student semester registration application using Java, featuring a user-friendly interface and robust backend.
- Streamlined the registration process and improved data management efficiency through a well-structured application architecture.
